

Ball Transfer Unit

Ball transfer unit consisting of a large solid high grade steel ball running on a number of smaller support balls housed in a hemispherical cup.

Supplied as standard with an integral felt seal and produced with a small self cleaning hole.

32mm ball unit is supplied in stainless steel with a grade 420 main ball. Fixing is either 2 or 3 hole.

Stainless steel units are used predominantly in the air cargo handling/ground support industry and are supplied without integral felt seals.
